1. Context

This Policy supports Waratah Institute's (the 'Institute's) commitment to ongoing engagement in scholarly activity by academic staff.

Scholarly activity ensures that academics are abreast of current developments in their discipline area, aware of the most recent learning and teaching practices, up-to-date with the latest advances in professional practice, and build capacity for emerging and future educational needs. The outcome of scholarly activity is characterised by an enriched, relevant and dynamic student experience, with improved graduate outcomes regarding work-readiness and further study.

2. Definitions

Pedagogy: the discipline that deals with the theory and practice of teaching and how these influence student learning.

Scholarly activity: academic activity which contributes to the reservoir of shared knowledge within a specific discipline area.

Scholarship: those activities concerned with gaining new or improved understanding, appreciation, and insight into a discipline or field of education, and engaging with and keeping up to date with advanced in the field. This includes advances in ways of learning and teaching in the field and advances in professional practice, as well as advances in disciplinary knowledge through original research.

Professional development: a process to ensure that staff have the ongoing capabilities required to fulfil the duties attached to their position, grow as a person, advance their careers, adapt to change, and assist in developing others.

3. Scope

This Policy applies to all academic staff at Waratah Institute.

4. Policy principles

The key principles informing this Policy are:

- importance of scholarly activities for offering students a quality and current program of study, resulting in work ready graduates or graduates who are prepared for further study; and
- joint responsibility of the academic and the Institute for engagement in scholarly activities.

5. Policy details

1.1. Categories of scholarship activity:

Scholarship in higher education includes four different categories:

- The scholarship of **discovery** - original research that advances knowledge;
- The scholarship of **integration** - synthesis of information across disciplines, across topics within a discipline, or across time;
- The scholarship of **practice** - involves the rigor and application of disciplinary expertise with results that can be shared with and/or evaluated by peers; and
- The scholarship of **learning and teaching** - the systematic study of learning and teaching processes. It differs from scholarly teaching in that it requires public sharing and the opportunity for application and evaluation by others.

1.2. Types of scholarly activity

Scholarship is a sub-set of professional development and encompasses a broad range of activities which can include, but is not necessarily limited to:

- presenting discipline-based topics and/or pedagogically-based topics at staff meetings, forums, conferences, workshops, or attending such events;
- integration of new discipline or pedagogical approaches into the curriculum;
- engaging in original research in a discipline or on learning and teaching practices, or sharing research findings;
- mentoring of less experienced teaching staff;
- taking on higher levels of academic leadership and responsibility;
- engagement with other higher education providers regarding discipline-based or pedagogically-based topics;
- benchmarking with internal and external colleagues regarding curriculum design and student outcomes;
- involvement in learning and teaching planning, projects, committees and reviews;
- contributions to scholarly publications such as journals and conference papers;

- contributions to a professional body, industry groups, or community of practice in advancing knowledge and practice;
- involvement in relevant activities of academic societies, editorial roles or peer review;
- undertaking higher level qualifications that lead to scholarly outputs, especially higher degree research programs; and
- undertaking advanced discipline-based practice.

1.3. Support for scholarship

Waratah Institute may support staff in undertaking scholarship in several ways, including:

- an annual allocation of financial resources to support scholarly activity, including attendance at conferences, seminars, or subsidising the cost of undertaking higher level qualifications;
- reduced or revised workload allocation to enable scholarly activity;
- secondment to a more senior academic position;
- mentoring of less experienced academic staff; and
- release to engage in industry or professional activities.

1.4. Responsibilities of academic staff

Waratah Institute expects that scholarship will be a standard part of the responsibilities of academic staff. Scholarly activities will be discussed as part of each academic staff member's performance and development plan.

Staff who undertake scholarly activity are expected to share associated findings or outcomes with other academic staff and incorporate learnings within the curriculum.

It is an expectation of staff in positions of academic leadership will:

- have advanced knowledge of pedagogy and contemporary developments in the discipline or field, informed by ongoing scholarship; and
- use this knowledge to improve student outcomes by leading discussions with academic staff, mentoring staff, and in activities associated with program review and program development.

Waratah Institute management is responsible for recognising and rewarding scholarly achievements.

6. Breaches

If a staff member is found to be in breach of this Policy, she or he may be subject to disciplinary action in accordance with the *Staff Code of Conduct* and *Misconduct Procedure*, which can be accessed from the Institute's website.

7. Appeals

Appeals concerning any decision taken in relation to this Policy should be made under the *Staff Complaints and Appeals Policy*, which can be accessed from the Institute's website.
